Photo-electric sensors

XU ranges Application, material handling and hoisting series.

With 4...20 mA and 0...10 V analog output signal. DC supply, solid-state output. "Time of flight" technology.

Product type	Laser transmission sensors. Distance measurement	Laser transmission sensors. Distance measurement with background suppression
--------------	--	--

 IO-Link

 IO-Link

Applications	<ul style="list-style-type: none"> ■ Packaging and conveying. ■ Material handling. 	
Range	0.1... 5 m/0.33...16.40 ft	0... 5 m/0...16.40 ft
Type of light	Class 1 laser, red, 650 nm	
Resolution	< 5 mm (12-bit)	–
Repeat accuracy	< 0.3%	–
Linearity	± 30 mm	–
Differential travel	40 mm	
Materials	Front panel (screen): PMMA. Casing: PC-ABS shock-resistant. M12 connectors: metal	
Degree of protection	IP 67 and IP 69K, depending on connector	
Operating temperature	- 40... + 60°C / - 40... + 140°F (- 40... + 50°C / - 40... + 117°F for XUK8TE2MM12)	
Storage temperature	- 40... + 80°C / - 40... + 176°F	
Dimensions (without connectors)	50 x 50 x 23 mm/1.97 x 1.97 x 0.91 in.	
Supply voltage + U _B	18...30 V ^{DC}	
No-load supply current	≤ 60 mA	
Output current I _e	≤ 100 mA	
Switching frequency f/Response time	≤ 500 Hz	
Type of outputs	1 x 4...20 mA and 0...10 V analog output + 1 auto-detect PNP/NPN switching output or IO-Link output	1 or 2 auto-detect PNP/NPN switching outputs or IO-Link output
Certifications	ECOLAB, CE, UKCA, cULus

Laser transmission sensors. Anti-collision mode and tandem mode	Accessories
	Brackets, clamps and connectors

Applications	■ Hoisting and mobile equipment.	Brackets and clamps for fixing sensors. Connectors for connecting sensors.
Range	0.3... 70 m/0.98...230 ft	
Type of light	Class 1 laser, red, 650 nm	
Resolution	< 17 mm (12-bit) for scaling the analog output between 1 and 70 m	
Repeat accuracy	<11 mm (for the discrete outputs)	
Linearity	± 70 mm	
Differential travel	120 mm	
Materials	Front panel (screen): PMMA. Casing: PC-ABS shock-resistant. M12 connectors: metal	
Degree of protection	IP 67 and IP 69K, depending on connector	
Operating temperature	- 30... + 50°C / - 22... + 122°F	
Storage temperature	- 30... + 60°C / - 22... + 140°F	
Dimensions (without connectors)	50 x 50 x 23 mm/1.97 x 1.97 x 0.91 in.	
Supply voltage + U _B	18...30 V ^{DC}	
No-load supply current	≤ 60 mA	
Output current I _e	100 mA	
Switching frequency f/Response time	10 ms	
Type of outputs	1 x 4...20 mA analog output + 2 PNP or NPN switching outputs	
Certifications	CE, UKCA, cULus

Photo-electric sensors

XU range Application, material handling series

“Time of flight” technology.

Distance measurement. Background suppression.

 IO-Link

ECOLAB[®]

Certified

Class 1 laser
conforming to IEC 60825-1
Visible laser radiation:
do not stare into beam

XUK8TAE1MM12 and XUK8TAE2MM12:

- 1 Yellow LED: switching output Q indicator
- 2 Push button (teach-in) Q: switching output
- 3 Yellow LED: switching output QA indicator
- 4 Green LED: operating voltage indicator
- 5 Push button (teach-in) QA: analog output
- 6 M12 connector

XUK8TAKDMM12:

- 1 Yellow LED: switching output Q1 indicator
- 2 Push button (teach-in) Q1: switching output
- 3 Yellow LED: switching output Q2 indicator
- 4 Green LED: operating voltage indicator
- 5 Push button (teach-in) Q2: switching output
- 6 M12 connector

XUK8TAKSMM12:

- 1 Yellow LED: switching output Q indicator
- 2 Push button (teach-in) Q: switching output
- 3 Green LED: operating voltage indicator
- 4 M12 connector

Presentation

XUK8T products are distance measurement sensors operating according to the Time of Flight (TOF) principle: light measured by time of flight.

These sensors are dedicated to tasks involving the measurement and control of objects with a variety of surfaces, over long distances. They provide reliable and accurate distance measurement, even with tilted, clear, reflective or luminous objects.

Thanks to the various output configurations, XUK8T sensors offer excellent flexibility in order to meet the highest number of requirements:

- reversible analog outputs, 4...20 mA or 0...10 V
- one or two switching outputs, 24 VDC, PNP/NPN type (1).

These sensors benefit from the standardised IO-Link input/output technology, dedicated to the communication between the sensors and the IO-Link gateway.

Note: IO-Link files available on the website www.tesensors.com/iolink

XUK8T sensor setting is simplified by three teach modes:

- background
- fixed object
- scrolling objects

The sensors can also be set by the external input: teach-in mode.

The visible laser radiation (class 1 laser) makes it easier to align and contributes to operator safety. With compact dimensions (50 x 50 x 23 mm), available in degrees of protection IP 67 and IP 69K, XUK8T sensors can easily be integrated to detect a variety of materials and surfaces:

- metal
- plastic and rubber
- wood
- non-transparent liquids

They are therefore suitable for a number of sectors:

- the timber industry, sawmills, furniture making
- the automotive industry, assembly, detection of dark objects
- conveying and material handling
- the metallurgy industry, etc.

Anti-collision mode and tandem mode for overhead cranes

Class 1 laser, conforming to IEC 60825-1
Visible laser radiation: do not stare into beam

- 1 Yellow LED: switching output Q1 indicator.
- 2 Push button (teach-in) Q: teaches near and far distances for anti-collision mode.
- 3 Yellow LED: switching output Q2 or analog output QA indicator.
- 4 Green LED: operating voltage indicator.
- 5 Push button (teach-in) QA: teaches the analog range.
- 6 M12 connector.

Presentation

The **XUK9TAH2MM12** sensor is a distance measurement sensor operating according to the Time of Flight (TOF) principle: light measured by time of flight.

It is dedicated to tasks involving measurement and control over long distances. Robust and compact, operating from -10 to + 60°C, it is specifically designed for overhead cranes (1).

The visible laser radiation (class 1 laser) makes it easier to align and contributes to operator safety.

Operating from 0.3 to 70 meters with great accuracy (60 mm differential travel), the sensor is set to detect the reflector located on a fixed object or another overhead crane.

The system thus allows two operating modes:

- anti-collision mode
- tandem mode

Anti-collision mode

Anti-collision mode is used to keep two overhead cranes a defined distance apart, in order to prevent equipment or loads bumping into one another.

This mode can also be set by a push button on the sensor (item 2) or remotely, by the external input.

In both cases, the “near distance” and “far distance” positions (see below) are stored in the sensor. These distances can be modified by executing a new teach procedure.

Near distance

Far distance

(1) Detailed characteristics are available on our website www.tesensors.com.

Photo-electric sensors

XU range Application, hoisting series

Anti-collision mode and tandem mode for overhead cranes

Presentation (continued)

Tandem mode

Tandem mode is used to split a load that cannot be supported by just one crane between two overhead cranes. When coupled together, overhead cranes can be used to transport long or heavy loads in the same bay of an industrial site. With this mode, a single operator can control two cranes simultaneously. Tandem mode is taught and activated by the external input.

The **XUK9TAH2MM12** sensor is also used for checking teaching and whether the cable has broken (1).
